DETAILED ACTION

This Office action is in response to the communication filed January 27, 2003, Paper No.

8.

Claims 1, 2, 4-10, 12-15 are pending in the instant application.

Election/Restriction

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the nucleotide sequences listed in claim 1 are subject to restriction. As per M.P.E.P. 2434, "the Commissioner has partially waived the requirements of 37 C.F.R. 1.141 and will permit a reasonable number of such nucleotide sequences to be claimed in a single application." Under this policy, in most cases, up to 1 (one) independent and distinct nucleotide sequence will be examined in a single application without restriction. Those sequences which are patentably indistinct from the sequence selected by the applicant will also be examined.

Claim 1 specifically claims antisense sequences which target and inhibit the expression of hemoatopoietic cell protein tyrosine kinase of SEQ ID NO: 3 and SEQ ID NO: 10. Each of these target sequences is considered to be structurally independent, because each of these sequences has a unique nucleotide sequence and each represents a different and specific target gene.

Furthermore, a search of all the sequences claimed presents an undue burden on the Patent and Trademark Office to search and examine all of the recited sequences. In view of the foregoing, applicants are required to elect up to 1 claimed target sequence from claim 1.

Art Unit: 1635

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
